

# SYS 2

## setup

**Rev A**  
**11/12/2008**

***CARVIN***  
**carvinservice.com**

## SYS2

- (1) PA620
- (2) LS1002
- (2) PRO50S Cables

## AC cable

Plug in the AC cord, push firmly

## Amp connection 1

PA620

LSX1002

Connect 1/4 inch cable from PA620 to LSX1002.

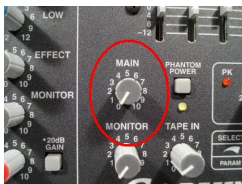

## Amp Connection 2

PA620

LSX1002

Connect 1/4 inch cable from PA620 to LSX1002

Tip: Turn down the Main volume control before turning the power ON. The PA620 has a soft start, meaning it takes 2 seconds to fully engage the sound. Plug in your favorite MIC to channel 1 turn the level up and the Main volume control up, and you are ready to go!

**CAUTION** – Always be certain that you are using genuine 1/4 speaker cables when connecting your amplifier to a speaker; using standard shielded guitar cables or “patch cords” will cause damage to your equipment (note - Carvin genuine speaker cables will typically have grey shrink wrap on the plug ends)
