SYS5

- (1) RX800
- (2) LM12
- (2) PRO50S Cables

AC cable

Plug in the AC cord, push firmly

Amp connection 1

RX800

LM12

Connect 1/4 inch cable from RX800 to LM12

Amp Connection 2

RX800

LM12

Connect 1/4 inch cable from RX800 to LM12

Tip: Turn down the Main volume control before turning the power ON. The RX800 has a soft start, meaning it takes 2 seconds to fully engage the sound. Plug in your favorite MIC to channel 1 turn the level up and the Main volume control up, and you are ready to go!

CAUTION – Always be certain that you are using genuine 1/4 speaker cables when connecting your amplifier to a speaker; using standard shielded guitar cables or “patch cords” will cause damage to your equipment (note - Carvin genuine speaker cables will typically have grey shrink wrap on the plug ends)
