

# **SYS 6**

## **setup**

**Rev A**  
**11/12/2008**

**CARVIN**  
**carvinservice.com**

## SYS6

- (1) RX1200
- (2) LM12
- (2) PRO50S Cables

## AC cable

Plug in the AC cord, push firmly

## Amp connection 1

RX1200

LM12

Connect 1/4 inch cable from RX1200 to LM12

## Amp Connection 2

RX1200

LM12

Connect 1/4 inch cable from RX1200 to LM12

Tip: Turn down the Main volume control before turning the power ON. The RX1200 has a soft start, meaning it takes 2 seconds to fully engage the sound. Plug in your favorite MIC to channel 1 turn the level up and the Main volume control up, and you are ready to go!

**CAUTION** – Always be certain that you are using genuine 1/4 speaker cables when connecting your amplifier to a speaker; using standard shielded guitar cables or “patch cords” will cause damage to your equipment (note - Carvin genuine speaker cables will typically have grey shrink wrap on the plug ends)
